

The 'One Devon Partnership Board' is responsible for the 5-year integrated care strategy that will focus on the following high level objectives:

- Improving **outcomes in population health and healthcare**
- Tackling **inequalities in outcomes, experience and access**
- Enhancing productivity and value for money
- Helping the NHS support **wider social and economic development**

The following principles have been agreed as part of the working document 'The way we do things together in Devon:

- A **personalised approach to health and care** which provides a 'joined-up' package based on individual need.
- Commitment to **ensuring high value interventions** are used consistently and earlier in pathways and to **stop providing health and care that does not add value and may be causing harm.**
- Managing risk across the system, ensuring that **decisions made in one sector do not increase the risk in another.**
- **Addressing challenges from a whole population perspective** (including the wider determinants of health e.g. housing)
- Ensuring spread of improvement and innovation
- The development of a 'Culture of Stewardship'

One Devon Cares about the people who use its services. We will ensure that peoples' care is **personalised, based on 'what matters to them'** and planned through Shared Decision-Making.

One Devon Cares about the **population** of Devon and helping to **keep people well and independent.** So we care about the **economic development** of Devon, and such things as **education, housing and crime** which have such an impact on peoples' lives and health
